Who We Are

The New Markets Tax Credit (NMTC) Working Group, founded by Novogradac & Company LLP in 2006, is comprised of NMTC industry participants for the express purpose of identifying and addressing technical and administrative issues that arise under the federal New Markets Tax Credit program.

What We Do

Established to provide a platform for NMTC industry participants, the NMTC Working Group encourages and facilitates the collaboration of industry professionals in their efforts to resolve technical and administrative program issues. Each month, members of the group participate in a conference call, discuss issues of concern, and based on those discussions provide comments and suggestions that are submitted in writing to the Internal Revenue Service and the Community Development Financial Institutions (CDFI) Fund.

Benefits of Membership

The \$5,000 annual membership in the NMTC Working Group provides:

- An opportunity to keep abreast of emerging issues and recommended practices in the industry.
- A platform where members can collaborate on similar issues and problems and work together to solve them.
- An opportunity to provide input on issues affecting the industry as a whole.
- An ability to share the costs of resolving common issues as a group rather than on an individual basis.

Priority Issues

- Comments and suggestions regarding proposed regulations.
- Development of industry recommended practices.
- Comments and suggestions regarding the most recent NMTC program guidance from the CDFI Fund.
- Comments and suggestions regarding the most recent NMTC program allocation application.
- Comments and suggestions regarding the most recent version of CIIS.
- Updating the NMTC mapping tools created by the NMTC Working Group.
