Royal Bank of Scotland  
Santander  
Société Générale  
State Street  
Sumitomo Mitsui FG  
UBS  
Unicredit Group  
Wells Fargo

---

<sup>1</sup> This initial list is based on the methodology set out in the BCBS document *Global systemically important banks: Assessment methodology and the additional loss absorbency requirement*, using data as of end-2009. The list of G-SIFIs will be updated annually and published in November every year. Therefore, the list will not be fixed – there can be new entries and exits every year and the number of G-SIFIs may change. The BCBS methodology will be reviewed every three years to capture changes in the banking system and progress in measuring systemic importance. The present list contains global systemically important banking groups; future lists may also contain G-SIFIs that are not banking groups. As from November 2012, the published list of global systemically important banking groups will show the allocations to buckets corresponding to the level of additional loss absorbency they would be required to meet had the requirements been in effect. The additional loss absorbency requirements will begin to apply from 2016, initially to those banks identified in November 2014 as globally systemically important using the allocation to buckets at that date.
