

The framework of President Joe Biden's Build Back Better plan, released last week, would provide about \$550 billion for green energy investment. In this week's Tax Credit Tuesday podcast, Michael Novogradac, CPA, and Novogradac partner Tony Grappone, CPA, discuss the implications of that potential legislation for renewable energy developers. They discuss what questions developers are asking about the current framework and what they should be doing now, supply-chain issues that have arisen since the COVID-19 pandemic and possibilities in repowering existing renewable energy properties. They also discuss the role of storage and how developers should view that option.

**Summaries of each topic:**

1. State of renewable energy in the Build Back Better framework and what developers should be doing (4:52-12:09)
2. Challenges in supplies, including the influence of the pandemic (12:10-13:57)
3. Repowering basics and what developers should consider (13:58-20:31)
4. Storage as a game-changer and how developers should view it (20:32-26:04)
