

PROJECT NO. 27706

REPORTS OF THE ELECTRIC § PUBLIC UTILITY COMMISSION
RELIABILITY COUNCIL OF TEXAS §
§ OF TEXAS

**ERCOT'S 2013 ANNUAL REPORT ON THE TEXAS
RENEWABLE ENERGY CREDIT TRADING PROGRAM**

COMES NOW, Electric Reliability Council of Texas, Inc. (ERCOT) and files its *2013 Annual Report on the Texas Renewable Energy Credit Trading Program* (Report) pursuant to P.U.C. SUBST. R. § 25.173(g)(11) and ERCOT Protocol Section 14.13. The Report is attached hereto as Attachment A. ERCOT files portions of this Report, Exhibits 1-6 in Attachment A, as confidential information pursuant to P.U.C. SUBST. R. § 25.362 and ERCOT Protocol Section 1.3.

Respectfully Submitted,

By:

Chad V. Seely
Assistant General Counsel
Texas Bar No. 24037466
(512) 225-7035 (Phone)

Austin, Texas 78744

ATTORNEY FOR ELECTRIC RELIABILITY
COUNCIL OF TEXAS, INC.

2013 Annual Report on the REC Program

This Report complies with the requirements of P.U.C. SUBST. R. 25.173(g)(11) and ERCOT Protocol Section 14.13. Exhibits 1-6 contain Protected Information as defined in P.U.C. SUBST. R. 25.362 and ERCOT Protocol Section 1.3, and are filed as confidential information. Participants in the Renewable Energy Credit (REC) Program (collectively, the REC Program) may view their information (used in the creation of the confidential exhibits) through their online REC accounts.

I. Existing and New Renewable Capacity

New renewable generation capacity in the REC Program increased in 2013. There are currently 146 REC generation accounts with a registered capacity of **13,358.5** megawatts (MW). There are a total of five (5) offset generator accounts with a total of **291** MW of capacity. *This renewable generation capacity exceeds the 2025 target of 10,000 MW of installed renewable generation capacity in the state that is set forth in Section 39.904 of the Public Utility Regulatory Act (PURA).*

Technology Type	REC Gen Accts	Offset Gen Accts	New MW Capacity	Offset MW Capacity	Total Current MW Capacity
Biomass	8	0	231.6	0	231.6
Hydro	2	2	33.1	178.5	211.6
Landfill Gas	15	1	94.8	3.3	98.1
Solar	15	0	174.9	0	174.9
Wind	106	2	12,824.1	109.2	12,933.3
Total	146	5	13,358.5	291	13,649.5

NOTE: The REC Program tracks renewable generation in Texas, including ERCOT and all other regions of Texas. The REC Program is voluntary and therefore only tracks generation that is registered in the REC Program. The MWs of capacity in this report may not align with the total Renewable Resource generation registered in ERCOT System Planning Reports and other reporting agencies.

II. Eligible Non-Texas Capacity

At this time, there are no eligible non-Texas capacity accounts participating in the REC Program.

III. REC Aggregation Company Activities

P.U.C. SUBST. R. 25.173 defines a REC Aggregator as an entity that manages the participation of two or more micro-generators in the REC Program. A micro-generator is defined as a customer that owns one or more eligible renewable energy generating units with a rated capacity of less than one (1) MW, operating on the customer's side of the utility meter. At this time, the only entities serving as Aggregators are Austin Energy and RKR Ranch, LLC.

IV. Facility Information

At the time of this report, the REC Program included 146 accounts for REC Generators. The owners and/or operators of each REC generation facility and enrollment date for Program participation are provided in the following table:

Generation Company	Date Enrolled
Aeolus Wind LLC	12/21/2004
American Wind Power Center	7/12/2005
Anacacho Wind Farm, LLC	5/22/2012
Aspen Power LLC	8/2/2010

V. Renewable Energy Generated

The total amount of energy generated by renewable generation resources tracked by the REC Program for 2013 is **38,133,357.52** MW hours (MWh). This represents an increase of approximately 12% in MWh of renewable generation from 2012. Since the REC Program is voluntary for Generation Entities, some renewable generation in the state may not be registered in the REC Program. The following table shows MWh totals from participating renewable generation by technology type for each quarter in 2013, including “offset” generation.

Technology Type	Quarter 1 MWh	Quarter 2 MWh	Quarter 3 MWh	Quarter 4 MWh	Total MWh
Biomass	36,648.38	36,622.30	78,316.48	48,976.35	200,563.51
Hydro	118,007.63	58,910.29	37,466.59	79,853.46	294,237.97
Landfill Gas	132,756.88	138,876.34	136,378.22	142,833.86	550,845.30
Solar	36,112.34	44,267.66	57,164.92	40,780.80	178,325.73
Wind	9,702,679.88	11,386,838.97	6,708,822.79	9,111,043.36	36,909,385.01
Grand Totals	10,026,205.11	11,665,515.56	7,018,149.00	9,423,487.84	38,133,357.52

VI. Compliance Premiums

Pursuant to P.U.C. SUBST. R. 25.173(c)(2), a compliance premium (CP) is a premium awarded by ERCOT in conjunction with a REC that is generated by non-wind renewable generation and meets the criteria in P.U.C. SUBST. R. 25.173(m). For purposes of the renewable energy portfolio standard (RPS) requirements, one (1) CP is equal to one (1) REC. During 2008, for the first time, CPs were made available to all “non-wind” renewable generation in the state that began producing energy after September 1, 2005. The following table shows the number of CPs awarded each year and the number of companies receiving CPs.

Year	# Of Companies Receiving CPs	CPs Awarded
2008	5	155,006
2009	10	200,570
2010	11	275,910
2011	16	367,513
2012	23	676,480
2013	26	626,401
	Total	2,301,880

VII. Renewable Energy Unit Retirements

In 2013, no generation account holders retired units.

VIII. Participating Retail Entities

At the time of this Report, 168 Retail Entities had accounts in the REC Program. The Retail Entities are identified in the following table:

Retail Entity	Date Enrolled
10K Energy LLC	8/19/2011
10K Energy LLC dba Mission Power	1/18/2011
4Change Energy Company	1/21/2002
Acacia Energy LLC	1/30/2009
Accent Energy Texas LP dba Dynowatt Powered by Accent Energy	3/14/2005
Accent Energy Texas, LP	12/3/2004

IX. Final Renewable Portfolio Standard Requirements

Each Retail Entity's final RPS requirement is provided as confidential information in Exhibit 1. In 2013, the total RPS requirement for all Retail Entities, after adjustments for previous true-ups as required by the Commission, was **12,621,749** RECs.

X. REC Offsets Allowed

Six (6) entities used **412,644** offsets in 2013. The offsets are provided as confidential information in Exhibit 2.

XI. REC Offsets Generated

The following table depicts the Offsets allocated by the Commission to each REC Offset Generator and compares that amount to each Resource's actual generation for 2013. A historical generation average for each Offset Generator has also been provided based on the units annual MWh production, as recorded in the REC account.

Generator Unit Name	Offset RECs Allotted by PUCT	2013 Annual Generation MWh	Comparison Calculation MWh	Historical Generation Average MWh

XII. REC and CP Retirements and Expirations

The list of Program participants retiring RECs and CPs for compliance year 2013, and the amount of those retirements, is provided as confidential information in Exhibit 3. The total number of RECs retired for the mandate was **12,443,778** including adjustments for previous year true-ups as required by the Commission. **194,134** CPs were also retired for the mandate.

Through March 31, 2014, there were **7,432,032** RECs and **68,334** CPs retired in the voluntary market for Compliance Year 2013.

To synchronize the reporting of voluntary REC retirements to a compliance year, all voluntary REC retirements that occur after March 31st of the current year, will be included in subsequent annual reports. Prior to this change, voluntary REC retirements up to the end of April had been included in the annual report of the current year.

Unlike retiring RECs for the annual mandate, owners may voluntarily retire RECs and CPs for any previous year. For various business reasons, in Compliance Year 2013 some owners retired an additional **123,319** RECs for 2011 and **7,332,506** RECs for 2012. An additional **115,821** CPs were also retired for 2012. A list of these specific retirements is provided as confidential information in Exhibit 4.

ERCOT retired a total of **116,567** RECs and **17,252** CPs due to expiration as required by P.U.C. SUBST. R. 25.173(l).

XIII. Renewable Portfolio Standard Retirement Compliance

The following list identifies Retail Entities and the percentage of non-compliance with the RPS requirement for each entity. A table identifying the exact amount of each RE's shortfall is provided as confidential information in Exhibit 5.

XIV. Industrial Load Opt-out

P.U.C. SUBST. R. 25.173(j)(1) provides that “[a] customer receiving service at transmission-level voltage who submits an opt-out notice to the commission for the applicable compliance period shall have its Load excluded from the RPS calculation.” In 2013, there were 84 electric service identifiers (ESI IDs) that opted out of the Program.

A table identifying the industrial Loads and associated MWh of Load removed from the calculation is provided as confidential information in Exhibit 6.
