(2) TREATMENT OF FUNDS.—Amounts made available under subparagraphs (B) through (D) of paragraph (1) shall be administered as if apportioned under chapter 1 of title 23, United States Code.
(c) Disadvantaged Business Enterprises.—

(1) Findings.—Congress finds that—

(A) despite the real improvements caused by the disadvantaged business enterprise program, minority- and women-owned businesses across the country continue to confront serious and significant obstacles to success caused by race and gender discrimination in the federally assisted surface transportation market and related markets across the United States;

(B) the continuing race and gender discrimination described in subparagraph (A) merits the continuation of the disadvantaged business enterprise program;

(C) recently, the disparities cause by discrimination against African American, Hispanic American, Asian American, Native American, and women business owners have been further exacerbated by the coronavirus pandemic and its disproportionate effects on minority- and women-owned businesses across the nation;

(D) Congress has received and reviewed testimony and documentation of race and gender discrimination from numerous sources, including congressional hearings and other inves-
tigative activities, scientific reports, reports
issued by public and private agencies at every
level of government, news reports, academic
publications, reports of discrimination by organ-
izations and individuals, and discrimination
lawsuits, which continue to demonstrate that
race- and gender-neutral efforts alone are insuf-
ficient to address the problem;

(E) the testimony and documentation de-
scribed in subparagraph (D) demonstrate that
discrimination across the United States poses
an injurious and enduring barrier to full and
fair participation in surface transportation-re-
lated businesses of women business owners and
minority business owners and has negatively af-
fected firm formation, development and success
in many aspects of surface transportation-re-
lated business in the public and private mar-
kets; and

(F) the testimony and documentation de-
scribed in subparagraph (D) provide a clear pic-
ture of the inequality caused by discrimination
that continues to plague our nation and a
strong basis that there is a compelling need for
the continuation of the disadvantaged business
enterprise program to address race and gender
discrimination in surface transportation-related
business.

(2) DEFINITIONS.—In this subsection, the fol-
lowing definitions apply:

(A) SMALL BUSINESS CONCERN.—

(7) COMPLIANCE WITH COURT ORDERS.—Nothing in this subsection limits the eligibility of an individual or entity to receive funds made available under titles I, II, V, and VII of this division and section 403 of title 23, United States Code, if the entity or person is prevented, in whole or in part, from complying with paragraph (3) because a Federal court issues a final order in which the court finds
that a requirement or the implementation of paragraph (3) is unconstitutional.

(8) SENSE OF CONGRESS ON PROMPT PAYMENT OF DBE SUBCONTRACTORS.—It is the sense of Congress that—

(A) the Secretary of Transportation should take additional steps to ensure that recipients comply with section 26.29 of title 49, Code of Federal Regulations (the disadvantaged business enterprises prompt payment rule), or any corresponding regulation, in awarding federally funded transportation contracts under laws and regulations administered by the Secretary; and

(B) such additional steps should include increasing the Department of Transportation’s ability to track and keep records of complaints and to make that information publicly available.

(d) LIMITATION ON FINANCIAL ASSISTANCE FOR STATE-OWNED ENTERPRISES.—

(1) IN GENERAL.—Funds provided under this section may not be used in awarding a contract, subcontract, grant, or loan to an entity that is owned or controlled by, is a subsidiary of, or is otherwise related legally or financially to a corporation based in a country that—

“SEC. 723. EXPANSION OF BROADBAND ACCESS IN
UNSERVED AREAS AND AREAS WITH LOW-
TIER OR MID-TIER SERVICE.

“(a) Program Established.—Not later than 180
days after the date of the enactment of this section, the
Commission, in consultation with the Assistant Secretary,
shall establish a program to expand access to broadband

amounts appropriated under subsection (g) among the States, in direct proportion to the population of each State.

“(B) PUBLIC NOTICE.—Not later than 195 days after the date of the enactment of this section, the Commission shall issue a public notice informing each State and the public of the amounts to be distributed under this paragraph. The notice shall include—

“(i) the manner in which a State shall inform the Commission of that State’s acceptance or acceptance in part of the amounts to be distributed under this paragraph;

“(I) to funding recipients to expand access to broadband service in unserved areas and areas with low-tier service;

“(II) to funding recipients to expand access to broadband service to unserved anchor institutions; or

“(III) to funding recipients to expand access to broadband service in
areas with mid-tier service, but only if a State does not have, or no longer has, any unserved areas or areas with low-tier service;

“(iii) shall conduct separate systems of competitive bidding for awards made to unserved anchor institutions under clause (ii)(II), if a State awards any amounts distributed under this paragraph to unserved anchor institutions;

“(3) COORDINATION OF FEDERAL AND STATE FUNDING.—The Commission, in consultation with
the Office of Internet Connectivity and Growth, shall
establish processes through the rulemaking under
subsection (e) to—

“(A) enable States to conduct statewide
systems of competitive bidding as part of, or in
coordination with, national systems of competi-
tive bidding;

“(B) assist States in conducting statewide
systems of competitive bidding;

“(C) ensure that program funds awarded
by the Commission and program funds awarded
by the States are not used in the same areas;
and

“(D) ensure that program funds and funds
awarded through other Federal programs to ex-
pand broadband service with a download speed
of at least 100 megabits per second, an upload
speed of at least 100 megabits per second, and
a latency that is sufficiently low to allow real-
time, interactive applications, are not used in
the same areas.

“(c) PROGRAM REQUIREMENTS.—

“(1) TECHNOLOGY NEUTRALITY REQUIRED.—
The entity administering a system of competitive
bidding (either a State or the Commission) in mak-
ing awards may not favor a project using any par-
ticular technology.

“(2) GIGABIT PERFORMANCE FUNDING.—The
Commission shall reserve 20 percent of the amounts
to be awarded by the Commission under subsection
(b)(1), and each State shall reserve 20 percent of
the amounts distributed to such State under sub-
section (b)(2), for bidders committing (with respect
to any particular project by such a bidder) to offer,
not later than the date that is 5 years after the date
on which funding is provided under this section for
such project, broadband service with a download
speed of at least 1 gigabit per second and an upload
speed of at least 1 gigabit per second or, in the case
of a project to provide broadband service to an
unserved anchor institution, broadband service with
a download speed of at least 10 gigabits per second
per 1,000 users and an upload speed of at least 10
gigabits per second per 1,000 users.

“(3) SYSTEM OF COMPETITIVE BIDDING PROC-
ESS.—The entity administering a system of competi-
tive bidding (either a State or the Commission) shall
structure the system of competitive bidding process
to—
“(A) first hold a system of competitive bid-
ding only for bidders committing (with respect
to any particular project by such a bidder) to
offer, not later than the date that is 5 years
after the date on which funding is provided
under this section for such project, broadband
service with a download speed of at least 1 gig-
abit per second and an upload speed of at least
1 gigabit per second or, in the case of a project
to provide broadband service to an unserved an-
chor institution, broadband service with a
download speed of at least 10 gigabits per sec-
ond per 1,000 users and an upload speed of at
least 10 gigabits per second per 1,000 users;
and

“(B) after holding the system of competi-
tive bidding required by subparagraph (A), hold
one or more systems of competitive bidding, in
areas not receiving awards under subparagraph
(A), to award funds for projects in areas that
are estimated to remain unserved areas, areas
with low-tier service, or (to the extent permitted
under this section) areas with mid-tier service,
or (to the extent permitted under this section)
for projects to offer broadband service to an-
chor institutions that are estimated to remain unserved anchor institutions, after the completion of the projects for which funding is awarded under the system of competitive bidding required by subparagraph (A) or any previous system of competitive bidding under this subparagraph.

“(4) **Funds Priority Preference.**—There shall be a preference, as determined by the entity administering a system of competitive bidding (either a State or the Commission), which shall take priority over any preference under paragraph (5), for bidders in such system of competitive bidding proposing projects that would expand access to broadband service in areas where at least 90 percent of the population has no access to broadband service or does not have access to broadband service offered—

“(A) with a download speed of at least 25 megabits per second; and

“(B) with an upload speed of at least 3 megabits per second.

“(5) **Funds Preference.**—There shall be a preference, as determined by the entity administering a system of competitive bidding (either a
State or the Commission), for bidders in such system of competitive bidding proposing projects—

“(A) with at least 20 percent matching funds from non-Federal sources;

“(B) that would expand access to broadband service on Tribal lands, as defined by the Commission;

“(C) that would provide broadband service with higher speeds than those specified in subsection (d)(2), except in the case of funds awarded under subparagraph (A) of paragraph (3);

“(D) that would expand access to broadband service in advance of the time specified in subsection (e)(5), except in the case of funds awarded under subparagraph (A) of paragraph (3);

“(E) that would expand access to broadband service to persistent poverty counties or high-poverty areas at subsidized rates;

“(F) that, at least until the date that is 10 years after the date of the enactment of this section, would provide broadband service with comparable speeds to those provided in areas that, on the day before such date of enactment,
were not unserved areas, areas with low-tier service, or areas with mid-tier service, with minimal future investment;

“(G) that would provide broadband service consistent with consumer preferences based on data and analysis conducted by the Commission; and

“(H) that would provide for the deployment of open-access broadband service networks.

“(6) UNSERVED AREAS AND AREAS WITH LOW-TIER OR MID-TIER SERVICE.—In determining whether an area is an unserved area, an area with low-tier service, or an area with mid-tier service or whether an anchor institution is an unserved anchor institution for any system of competitive bidding authorized under this section, the Commission shall implement the following requirements through the rulemaking described in subsection (e):

“(A) DATA FOR INITIAL DETERMINATION.—To make an initial determination as to whether an area is an unserved area, an area with low-tier service, or an area with mid-tier service or whether an anchor institution is an
unserved anchor institution, the Commission shall—

“(i) use the most accurate and granular data on the map created by the Commission under section 802(c)(1)(B);

“(ii) refine the data described in clause (i) by using—

“(I) other data on access to broadband service obtained or purchased by the Commission;

“(II) other publicly available data or information on access to broadband service; and

“(III) other publicly available data or information on State broadband service deployment programs; and

“(iii) not determine an area is not an unserved area, an area with low-tier service, or an area with mid-tier service on the basis that one location within such area does not meet the definition of an unserved area, an area with low-tier service, or an area with mid-tier service.
“(B) Initial determination.—The Commission shall make an initial determination of the areas that are unserved areas, areas with low-tier service, and areas with mid-tier service and which anchor institutions are unserved anchor institutions not later than 270 days after the date of the enactment of this section.

“(C) Challenge of determination.—

“(i) In general.—The Commission shall provide for a process for challenging any initial determination regarding whether an area is an unserved area, an area with low-tier service, or an area with mid-tier service or whether an anchor institution is an unserved anchor institution that, at a minimum, provides not less than 45 days for a person to voluntarily submit information concerning—

“(I) the broadband service offered in the area, or a commitment to offer broadband service in the area that is subject to legal sanction if not performed; or

“(II) the broadband service offered to the anchor institution.
“(ii) Streamlined Process.—The Commission shall ensure that such process is sufficiently streamlined such that a reasonably prudent person may easily participate to challenge such initial determination with little burden on such person.

“(D) Final Determination.—The Commission shall make a final determination of the areas that are unserved areas, areas with low-tier service, or areas with mid-tier service and which anchor institutions are unserved anchor institutions within 1 year after the date of the enactment of this section.

“(7) Notice, Transparency, Accountability, and Oversight Required.—The program shall contain sufficient notice, transparency, accountability, and oversight measures to provide the public with notice of the assistance provided under this section, and to deter waste, fraud, and abuse of program funds.

“(8) Competence.—The program shall contain sufficient processes and requirements, as established by an entity administering a system of competitive bidding (either a State or the Commission), to ensure that, prior to bidding in such system of com-
petitive bidding, a provider of broadband service seeking to participate in such system of competitive bidding—

“(A) is capable of carrying out the project in a competent manner in compliance with all applicable Federal, State, and local laws;

“(B) has the financial capacity to meet the buildout obligations of the project and requirements as set forth under this section and as may be further prescribed by the Commission; and

“(C) has the technical and operational capability to provide broadband services in the manner contemplated by the provider’s bid in the system of competitive bidding, including a detailed consideration of the provider’s prior performance in delivering services as contemplated in the bid and the capabilities of the provider’s proposed network to deliver the contemplated services in the area in question.

“(9) CONTRACTING REQUIREMENTS.—All laborers and mechanics employed by contractors or subcontractors in the performance of construction, alteration, or repair work carried out, in whole or in part, with assistance made available under this sec-
tion shall be paid wages at rates not less than those prevailing on projects of a similar character in the locality as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code. With respect to the labor standards in this paragraph, the Secretary of Labor shall have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (64 Stat. 1267; 5 U.S.C. App.) and section 3145 of title 40, United States Code.

“(D) Mediation and conciliation for failure to reach a collective bargaining agreement.—

“(i) In general.—If the parties have failed to reach an agreement before the date that is 90 days after the date on which bargaining is commenced under subparagraph (C), or any later date agreed upon by both parties, either party may notify the Federal Mediation and Conciliation

neutral member mutually agreed to by the parties.

“(ii) Dispute Settlement.—A majority of the tripartite arbitration panel shall render a decision settling the dispute and such decision shall be binding upon the parties for a period of two years, unless amended during such period by written consent of the parties. Such decision shall be based on—

“(I) the employer’s financial status and prospects;

“(II) the size and type of the employer’s operations and business;

“(III) the employees’ cost of living;

DIVISION J—COMMITTEE ON FINANCIAL SERVICES

SECTION 60001. SHORT TITLE.

This division may be cited as the “Housing is Infrastructure Act of 2020”.

SEC. 60002. FINDINGS.

The Congress finds the following:

(1) Residential segregation and systemic community disinvestment continue to disproportionately
affect the well-being and socioeconomic opportunity of children, low-income residents, and people of color.

(2) Affordable and accessible housing allows people with disabilities to live independent lives and supports aging in place, yet less than 2 percent of the housing stock in the United States is accessible for individuals with disabilities.

(3) Affordable housing is a critical part of the national infrastructure of the United States but there is a severe shortage of affordable housing in the United States and the existing stock is badly in need of repair.

(4) According to a 2010 study sponsored by the Department of Housing and Urban Development, there was a $26 billion backlog of capital needs for public housing; that figure is likely higher today, with some groups estimating the backlog of capital needs for public housing to be as high as $70 billion.

(5) There are 14,000 units supported by Rural Rental Housing Loans under section 515 of the Housing Act of 1949 and Farm Labor Housing Loans under section 514 of the Housing Act of 1949. According to National Rural Housing Coalition, it would take an estimated $1 billion in the
Multi-Family Housing Revitalization Demonstration Program (MPR) funding to fully address the capital backlog for rural housing properties.

(6) Federal investment in housing helps to create jobs and stimulate the economy.

(7) When the American Recovery and Reinvestment Act of 2009 (Public Law 111–5) was enacted, which included funding for public housing, researchers found that for each $1.00 in direct spending on public housing, there was an additional $2.12 of indirect and induced economic activity nationwide for a total economic impact of $3.12 for each $1.00 in direct spending on public housing.

(8) According to the National Association of Home Builders, building 100 affordable rental homes generates $11.7 million in local income, $2,200,000 in taxes and revenue for local governments, and 161 local jobs.

(9) Researchers estimate that the growth in the gross domestic product from 1964–2009 would have been 13.5 percent higher if families had better access to affordable housing, which in turn could have led to an additional $1.7 trillion increase in income, equivalent to $8,775 in additional wages for each worker.

(1) repairs are major, non-recurring mainte-
nance of a mission critical asset;

(2) the Secretary determines that the project
has lost 50 percent or more of its designed carrying

vveyance through the project would be used primarily
for groundwater recharge to assist in meeting
groundwater sustainability goals defined under State law.

Subtitle B—FUTURE Western Water Infrastructure and Drought Resiliency

SEC. 81201. FINDINGS.

Congress finds the following:

(1) As expressed in the Water Supply Act of 1958, Congress has recognized the primary responsibilities of the States and local interests in developing water supplies for domestic, municipal, industrial, and other purposes, and that the Federal Government should participate and cooperate in these projects.
(2) There is a long and robust legal precedent of Federal deference to State primacy in water law and the legal system that States establish for resolving disputes over water use, with the Supreme Court finding in Kansas v. Colorado that “Congress cannot enforce either rule upon any state” in matters of the right regulation of water rights.

(3) The entire American West and Southwest are facing forecasts of prolonged droughts that will leave States facing major water shortages and catastrophic wildfires.

(4) Recent periods of drought in the American West have also occurred with higher temperatures and reduced snowpack and led to what climate scientists recently concluded was possibly the most severe drought in California in over 1,200 years.

(5) The Colorado River has been under drought conditions since 2000, and the chances of a “megadrought” striking the Southwest and central Great Plains are on the rise according to forecasts from climate scientists.

(6) Addressing water shortages today and in the future will require action from the Federal Government that respects State, local, and Tribal law, and that the policies that respond to droughts
should not pit State against State, region against re-
gion, or stakeholders against one another.

(7) Congress recognizes the range of separate,
distinct Federal agencies with authorities and re-
sources that play a role in water supply, including
treatment and remediation of groundwater, surface
water storage, water recycling and reuse, and other
clean water infrastructure, and to avoid duplication
and ensure the efficiency and effectiveness of these
various Federal roles, there is a need for improved
coordination, streamlining, and collaboration, both
among Federal agencies and with drought-impacted
States and localities.

(8) It is the policy of the United States to re-
spect California’s coequal goals, established by the
Delta Reform Act of 2009, of providing a more reli-
able water supply for California and protecting, re-
storing, and enhancing the Delta ecosystem, and
these coequal goals shall be achieved in a manner
that protects and enhances the unique cultural, rec-
reational, natural resource, and agricultural values
of the Delta as an evolving place.

(9) The State of California, in CA Water Code
section 85021, has established a policy to reduce re-
liance on the Delta in meeting California’s future
water supply needs through a statewide strategy of investing in improved regional supplies, conservation, and water use efficiency; California law directs each region that depends on water from the Delta watershed to improve its regional self-reliance for water through investment in water use efficiency, water recycling, advanced water technologies, local and regional water supply projects, and improved regional coordination of local and regional water supply efforts; and it is the intent of Congress to ensure that Federal programs, policies, and investments respect and compliment, and do not undermine or conflict with, California’s policy of reducing reliance on Delta diversions.

(10) Federal agencies should operate the Bureau of Reclamation’s Central Valley Project in California in compliance with all Federal and State laws, including biological opinions, while working with the State to maximize operational flexibility in order to deliver as much water as reasonably possible to drought-impacted areas and minimize the harm suffered by fish and wildlife as a result of drought.

(11) The Reclamation Fund was established in 1902 with the express purpose of providing for the construction and maintenance of water infrastruc-
ture for the economic development of the Western States and territories, with revenues deposited into the fund out of public land sales within these Western States and territories.

(12) Since 1902, the Reclamation Fund has been supplemented with additional revenues from Federal water resources development and mineral and natural resource leases on Federal lands, such that the surplus within the Reclamation Fund now exceeds $17,000,000,000.

(13) The Reclamation Fund represents a transfer of a portion of receipts from Federal lands and Federal natural resources in the West back to the West for water development, and the Reclamation Fund’s surplus should be used to assist the West in meeting its water needs for public health and safety, for expanding water recycling, reuse, and reclamation, and for meeting the emergency needs of communities impacted by drought.

(14) The Federal funding provided in this subtitle will support near-term and long-term water supply reliability for the Western States, including through the use of the Reclamation Fund surplus to support long-term water infrastructure investment.
(15) The Federal funding authorized in chapter 1 of this subtitle can help provide additional water supplies to the Western States in the near-term, including 650,000 acre-feet per year in additional average yield through water reuse projects, 350,000 acre-feet per year in additional average yield through water storage projects, and 100,000 acre-feet per year in additional average yield through water desalination projects.

(16) Robust Federal investment and support is needed to assist the Western States in developing future drought resiliency in the face of climate change, which will continue to exacerbate existing water supply challenges in an already arid region of the country.

(1) statute;

(2) rulemaking under section 83212; or

(1) to support the fulfillment of the purposes described in section 83212(b);

(2) to ensure coordination and consistency across Federal agencies in the development, implementation, and management of National Wildlife Corridors; and
1997

(3) to develop a timeline for the implementation
of National Wildlife Corridors.

SEC. 83212. ADMINISTRATIVE DESIGNATION OF NATIONAL
WILDLIFE CORRIDORS.

(a) Rulemaking.—

(1) National Wildlife Corridors.—Not
later than 2 years after the date of enactment of
this Act, the Secretary, in consultation with the Sec-
retaries, pursuant to the land, water, and resource
management planning and conservation authorities
of the Secretaries, shall establish a process, by regu-
lation, for the designation and management of Na-
tional Wildlife Corridors on Federal land or water
under the respective jurisdictions of the Secretaries.
Where a National Wildlife Corridor crosses federal
land or water under the jurisdiction of several secre-
taries, then the Secretary must obtain concurrence
from the applicable Secretaries before a National
Wildlife Corridor may be designated.

(2) Federal Land and Water Manage-
ment.—The Secretaries shall consider the designa-
tion of National Wildlife Corridors in any process re-
lying to the issuance, revision, or modification of a
management plan for land or water under the re-
1998

spective jurisdiction of the Secretaries insofar as a corridor is consistent with the purpose of the plan.

(b) CRITERIA FOR DESIGNATION.—The regulations promulgated by the Secretary under subsection (a)(1)
shall ensure that, in designating a National Wildlife Corridor, the Secretaries—

(1) base the designation of the National Wild-
life Corridor on—

(A) coordination with existing—

(i) National Wildlife Corridors;

(ii) corridors established by States;

and

(iii) Tribal Wildlife Corridors; and

(B) the best available science of—

(i) existing native species habitat; and

(ii) likely future native species habi-
tats;

(2) determine that the National Wildlife Cor-
ridor supports the connectivity, persistence, resil-
ience, and adaptability of the native species for
which it has been designated by providing for—

(A) dispersal and genetic exchange between
populations;
1999

(B) range shifting, range expansion, or range restoration, such as in response to climate change;

(C) seasonal movement or migration; or

(D) succession, movement, or recolonization following—

(i) a disturbance, such as fire, flood, drought, or infestation; or

(ii) population decline or previous extirpation;

(3) consult the Database; and

(4) consider recommendations from the National Coordination Committee under section 83332(e)(2)(C).

(c) DESIGNATION OF FEDERAL LAND OR WATER REQUIRING RESTORATION OR CONNECTION OF HABITAT.—

The Secretaries may designate as a National Wildlife Corridor land or water that—

(1) is necessary for the natural movements of 1 or more native species;

(2) requires restoration, including—

(A) land or water that is degraded; and

(B) land or water from which a species is currently absent—
2000

(i) but may be colonized or recolonized by the species naturally; or

(ii) to which the species may be reintroduced or restored based on habitat changes; and

(3) is fragmented or consists of only a portion of the habitat required for the connectivity needs of 1 or more native species.

(d) Nomination for Designation.—

(1) In General.—In establishing the process for designation under subsection (a)(1), the Secretary shall include procedures under which—

(A) any State, Tribal, or local government, or a nongovernmental organization engaged in the conservation of native species and the improvement of the habitats of native species, may submit to the Secretaries a nomination to designate as a National Wildlife Corridor an area under the respective jurisdiction of the Secretaries; and

(B) the Secretaries shall consider and, not later than 1 year after the date on which the nomination was submitted under subparagraph (A), respond to any nomination submitted under that subparagraph.
(2) SUPPORTING DOCUMENTATION.—A nomination for designation under paragraph (1)(A) shall include supporting documentation, including—

(A) the native species for which the National Wildlife Corridor would be designated;

(B) summaries and references of, with respect to the designation of a National Wildlife Corridor—

(E) any additional information the Secretaries, in consultation with the National Coordi-
2002
	nation Committee, determine is relevant to the
nomination.

c) Designation on Military Land.—

(1) In general.—Any designation of a Na-
tional Wildlife Corridor on a military installation—

(A) shall be consistent with the use of mili-
tary installations and State-owned National
Guard installations to ensure the preparedness
of the Armed Forces; and

(B) may not result in a net loss in the ca-
pability of military installation lands to support
the military mission of the installation.

(2) Suspension or termination of designation.—The Secretary of Defense may suspend or
terminate the designation of any National Wildlife
Corridor on a military installation if the Secretary of
Defense considers the suspension or termination to
be necessary for military purposes, after public no-
tice of the suspension or termination.

SEC. 83213. MANAGEMENT OF NATIONAL WILDLIFE COR-
RIDORS.

(a) In general.—The Secretaries shall, consistent
with other applicable Federal land and water management
requirements, laws, and regulations, manage each Na-
tional Wildlife Corridor under the respective administra-
2003

tive jurisdiction of the Secretaries in a manner that con-
tributes to the long-term connectivity, persistence, resil-
ience, and adaptability of native species for which the Na-

life Corridor in accordance with section 83311(b) to ad-
ance the purposes described in section 83211(b).

(c) Road Mitigation.—In the case of a National
Wildlife Corridor that intersects, adjoins, or crosses a new
or existing State, Tribal, or local road or highway, the rel-
evant Secretaries shall coordinate with the Secretary of
Transportation and State, Tribal, and local transportation
agencies, as appropriate, to identify and implement vol-
untary environmental mitigation measures—

(1) to improve public safety and reduce vehicle
cased native species mortality while maintaining
habitat connectivity; and

ments of native species through strategies such as—
(A) the construction, maintenance, or replacement of
native species underpasses, overpasses, and culverts;
and

(B) the maintenance, replacement, or re-
moval of dams, bridges, culverts, and other
hydrological obstructions.

“(B) Demonstration of Conditions.—Such conditions are demonstrated by—

“(i) documentation of the role of the project in such area’s economic development strategy or other economic and community development planning process;

“(ii) any other documentation of the planned economic and community use of the project site after the primary reclamation activities are completed, which may in-

other evidence that, once reclaimed, the
site is reasonably anticipated to be used
for one or more industrial, commercial,
residential, agricultural, or recreational
purposes; or
“(iii) any other documentation agreed
to by the State or Indian tribe that dem-
onstrates the project will meet the criteria
set forth in this subsection.

conducted in a community—
“(i) that has been adversely affected
economically by a recent reduction in coal
mining related activity, as demonstrated by
employment data, per capita income, or
other indicators of economic distress; or
“(ii)(I) that has historically relied on
coal mining for a substantial portion of its
economy; and
“(II) in which the economic contribution of coal mining has significantly declined.

“(B) Submission and publication of evidence or analysis.—Any evidence or analysis relied upon in selecting the location of a project under this subparagraph shall be submitted to the Secretary for publication. “(5) WAIVER.—If the State or Indian tribe—

“(A) cannot provide documentation described in paragraph (1)(B) for a project conducted under a priority stated in paragraph (1) or (2) of section 403(a), or

“(B) is unable to meet the requirements under paragraph (2),
the State or Indian tribe shall submit a written declaration to the Secretary requesting an exemption from the requirements of those subparagraphs. The declaration must explain why achieving favorable conditions for economic or community development at the project site is not practicable, or why the requirements of paragraph (2) cannot be met, and that sufficient funds distributed annually under section 401 are not available to implement the project. Such request for an exemption is deemed to be approved, except the Secretary shall deny such request if the Secretary determines the declaration to be substantially inadequate. Any denial of such request shall be resolved at the State’s or Indian tribe’s request through the procedures described in subsection (e).

Federal agencies since the programmatic environ-
mental impact statement was finalized;

(2) for solar energy, by supplementing the July
2012 final programmatic environmental impact
statement for solar energy development and incor-
porating any additional regional analyses that have
been completed by Federal agencies since the pro-

(B) impose economic hardships;

(C) limit commercial interest in a competitive lease sale or right-of-way grant; or

(D) are not competitively priced compared to other available land; or

(2) that a reduced rental rate or capacity fee is necessary to promote the greatest use of wind and solar energy resources, especially those resources in-
side priority areas. Rental rates and capacity fees for projects that are within the boundaries of a Designated Leasing Area but not formally recognized as being in such an area shall be equivalent to rents and fees for new leases inside of a Designated Leasing Area.
