

R. Exclusions from Income

1. Regulations for the multifamily subsidized housing programs covered by this handbook specifically exclude certain types of income from annual income. However, many of the items listed as exclusions from annual income under HUD requirements are items that the IRS includes as taxable income. Therefore, it is important for owners to focus specifically on the HUD program requirements regarding annual income.
2. Among the items that are excluded from annual income is the value of food provided through:
 - a. The Meals on Wheels program, food stamps, or other programs that provide food for the needy;
 - b. Groceries provided by persons not living in the household; and
 - c. Amounts received under the School Lunch Act and the Child Nutrition Act of 1966, including reduced lunches and food under the Special Supplemental Food Program for Women, Infants and Children (WIC).

Examples – Income Exclusions

- The Value of Food Provided through the Meals on Wheels Program or Other Programs Providing Food for the Needy. Jack Love receives a hot lunch each day during the week in the community room and an evening meal in his apartment. One meal is provided through the Meals on Wheels program. A local church provides the other. The value of the meals he receives is not counted as income.
- Groceries provided by persons not living in the household. Carrie Sue Colby's mother purchases and delivers groceries each week for Carrie Sue and her two year old. The value of these groceries is not counted as income despite the fact that these are a regular contribution or gift.
- Amounts Received Under WIC or the School Lunch Act. Lydia Jeffries' two children receive a free breakfast and reduced priced lunches at school every day through the Special Supplemental Food Program for Women, Infants and Children (WIC). The value of this food is not counted as income.

3. Some additional examples of income that are excluded from the calculation of annual income follow.

Examples – Income Exclusions

- Resident service stipends. Rich Fuller receives \$50 a month for distributing flyers for management. This amount is excluded from annual income.
- Deferred periodic payments of social security benefits. Germain Johnson received \$32,000 in deferred social security benefits following a lengthy eligibility dispute. This delayed payment of social security benefits is treated as an asset, not as income.
- Income from training programs. Jennifer Jones is participating in a qualified state-supported employment training program every afternoon to learn improved computer skills. Each morning, she continues her regular job as a typist. The \$250 a week she receives as a part-time typist is included in annual income. The \$150 a week she receives for participation in the training program is excluded in annual income.
- Earned Income Tax Credit refund payments. Mary Frances Jackson is eligible for an earned income tax credit. She receives payments from her employer each quarter because of the tax credit. These payments are excluded in annual income.

5-7 Calculating Income from Assets

Annual income includes amounts derived from assets to which family members have access.

A. What is Considered an Asset?

1. Assets are items of value that may be turned into cash. A savings account is a cash asset. The bank pays interest on the asset. The interest is the *income* from that asset.
2. Some tenants have assets that are not earning interest. A quantity of money under a mattress is an asset: it is a thing of value that could be used to the benefit of the tenant, but under the mattress it is not producing income.
3. Some belongings of value are not considered assets. Necessary personal property is not counted as an asset. Exhibit 5-2 summarizes the items that are considered assets and those that are not.

B. Determining Income from Assets

Note: For families receiving only BMIR assistance, it is not necessary to determine whether family assets exceed \$5,000. The rule for imputing income from assets does not apply to the BMIR program.

1. The calculation to determine the amount of income from assets to include in annual income considers both of the following:
 - a. The total cash value of the family's assets; and
 - b. The amount of income those assets are earning or could earn.
2. The rule for calculating income from assets differs depending on whether the total cash value of family assets is \$5,000 or less, or is more than \$5,000.

C. Determining the Total Cash Value of Family Assets

1. To comply with the rule for determining the amount of income from assets, it is necessary to first determine whether the total "cash value" of family assets exceeds \$5,000.
 - a. The "cash value" of an asset is the market value less reasonable expenses that would be incurred in selling or converting the asset to cash, such as the following:
 - (1) Penalties for premature withdrawal;
 - (2) Broker and legal fees; and
 - (3) Settlement costs for real estate transactions.

The cash value is the amount the family could actually receive in cash, if the family converted an asset to cash.

Example – Calculating the Cash Value of an Asset

A family has a certificate of deposit (CD) in the amount of \$5,000 paying interest at 4%. The penalty for early withdrawal is three months of interest.

$$\$5,000 \times 0.04 = \$200 \text{ in annual income}$$

$$\$200 / 12 \text{ months} = \$16.67 \text{ interest per month}$$

$$\$16.67 \times 3 \text{ months} = \$50.01$$

$$\$5,000 - \$50 = \$4,950 \text{ cash value of CD}$$

- b. It is essential to note that a family is not required to convert an asset to cash. Determining the cash value of the asset is done simply as a calculation by the owner because it is a required step when determining income from assets under program requirements.
