2010 Partnership Returns Line Item Estimates

The line item estimates in this publication are taken from the Statistics of Income (SOI) 2010 Partnership Returns sample and subject to data limitations that occur in statistical sampling. The 2010 sample is only one of many SOI could have randomly selected using the same design. The estimates are not actual line item counts or money amounts. Below are the coefficients of variation (CV) and the lower and upper bounds of computed 95% confidence intervals for selected variable totals SOI estimated from the 2010 sample.

Note: Estimates constructed from different samples usually vary. The standard error of an estimate is a measure of its variation among all possible samples. The standard error is used to measure the precision with which an estimate from a particular sample approximates the average result of all the possible samples. The sample estimate and an estimate of its standard error are used to construct an interval estimate with prescribed confidence that the interval includes the actual population value. The coefficients of variations (CV) allow for the comparison of variables. The CV is often presented as a percent, the ratio multiplied by 100.

All money amounts and frequencies were subject to rounding errors. All values on the money amount pages were rounded to the nearest \$1,000. Amounts of \$500 or more were rounded up to the next thousand. Total amounts between +\$500 and -\$500 were marked with a [1] to indicate that an amount greater than zero was present.

Whenever a cell frequency was less than 5, the estimate was deleted and marked with a [d] in order to avoid disclosure of information about specific partnerships. An estimate based on fewer than 10 returns, not selected at the 100-percent rate, was indicated by an asterisk (*) and considered statistically unreliable. Researchers typically should use these estimates in combination with other tabulated values due to the small sample size.

Seven attachments to the Form 1065 are included in the 2010 study but were not represented in enough quantity in the sample to include in this publication. These forms include the following: Form 3800, General Business Credit; Form 5884-B, New Hire Retention Credit; Form 8820, Orphan Drug Credit; Form 8834, Qualified Plug-in Electric and Electric Vehicle Credit; Form 8881, Credit for Small Employer Pension Plan Startup Costs; Form 8896, Low Sulfur Diesel Fuel Production Credit; and Form 8936, Qualified Plug-in Electric Drive Motor Vehicle Credit.

The data for Form 1065-B, U.S. Return of Income for Electing Large Partnerships, are included in the line item counts and money amounts where equivalent fields existed. They are not broken out separately from the Form 1065 data.
