Dear Ms. Harris:

Thank you for the opportunity to comment on the implementation of the CDFI Bond Guarantee Program (CBGP). This new CDFI Fund initiative represents an unprecedented opportunity to support economic development in communities across our nation. The National NeighborWorks Association (NNA) strongly supports the program and we urge the CDFI Fund to implement it as quickly as possible.

NNA is the national trade association of “NeighborWorks®” organizations: non-profits chartered by Neighborhood Reinvestment Corporation (d/b/a NeighborWorks® America) that create affordable housing and economic opportunities in America’s urban, rural and suburban communities. Our membership includes over 190 NeighborWorks® and non-NeighborWorks® non-profit housing and community development organizations in 49 states, Washington, DC and Puerto Rico.

Our members have a 30+ year history of facilitating lending to borrowers – including lower income families, borrowers with impaired credit and others who would not normally qualify for a conventional mortgage. NNA members typically serve the underserved, overlooked, and unfairly targeted.

Over 90 organizations in the NeighborWorks® Network are current CDFIs and have utilized over \$119 million of CDFI funding over the past ten years. Our local NeighborWorks organization members prepare borrowers to qualify for reasonably priced traditional mortgage loans so that they may achieve sustainable homeownership. The following recommendations are most critical to our members’ successful participation in the CBGP:

Program Structure and Bond Mechanics

The CDFI Fund should exercise maximum flexibility in implementing the CBGP. The program must allow a variety of bond structures in order to meet the capital needs of a diversity of CDFIs. The CDFI Bond Program must be flexible enough to accommodate aggregation of loans from various originators (directly or indirectly) as well as single originators. CDFI bonds should accommodate a full spectrum of asset classes and no one structure should dominate.

Program Eligibility

Though each bond issue should be considered separately and on its own merits, the Fund must ensure that all issuers have a strong track record of meeting the needs of low income and disadvantaged communities, are mission-based, and can direct bond proceeds to appropriate community and economic development uses. Issuers should be selected based on their proposed strategy for deploying bond proceeds and their historical track record in meeting the needs of the communities and populations targeted in a Capital Distribution Plan, and that no preference to an organization's size or reach be included; i.e. small CDFIs have an equal chance at participation as large CDFIs. We recommend an approach that parallels the CDFI Fund's selection process for evaluating applicants to its CDFI Financial Assistance (FA) program in assessing both eligibility and capacity to deliver on a Capital Distribution Plan. Regardless of structure, eligibility criteria should apply to the CDFIs themselves, not the end borrower if the borrower is not a CDFI.

Use of Funds

As the intent of the CBGP is to provide new capital sources for CDFIs, its uses should support CDFIs in their financing activities, both existing strategies and new ones made possible by the CBGP. Therefore we advise caution on any limits to specific eligible uses.

Eligible Bond Proceeds must include all loan and investment types and financing segments as long as they meet the definition of community or economic development in the CDFI Fund authorizing statute. The range of uses should include but not be limited to refinancing, capitalization of a revolving loan fund, loans to and purchase of loans from other CDFIs, loan loss reserves, the required risk-share pool, debt service reserves, and/or sinking funds in support of a Federally guaranteed bond, investments of regulatory capital—all activities that are routinely undertaken by CDFIs or would be part of a strategy for prudent use of bond proceeds. The Fund should not dictate or restrict the proportion of proceeds that can be directed to a particular use.

Risk Assessment and Mitigation

CDFIs have a strong record of success at serving distressed markets with minimal losses and delinquencies. The CBGP can and should rely on this unique expertise. Underwriting criteria (e.g., leverage, cash flow coverage, asset quality) and risk mitigation techniques (e.g., required credit enhancement, liquidity requirements, interest rate protection, etc.) should be based on the specific risk profile of the planned use of proceeds and on the loss performance history of the participating CDFI not on a generic, one-size-fits-all set of requirements. Historic loss and payment performance data from conventional financial markets are generally not reliable indicators of CDFIs' performance and should not be the basis for the Fund's risk assessment for the CBGP.

The Fund should employ a robust toolbox of strategies to mitigate risk and expand program participation. Some elements of that toolbox could include over-collateralization, covenants, third party guarantees, bond insurance, supplemental loss reserves funded by excess spreads, and a supplemental risk-sharing mechanism.

The Fund should allow for the risk-share pool to be funded from various mechanisms including but not limited to: bond proceeds, CDFI investors, and investment cash flows (e.g. the spread between assets earned and debt service required for the bond).

Monitoring, Evaluation, and Impact

Performance evaluation should be outcome-based. No two bond issues will look the same or produce the same results. CDFIs should be held accountable to the outcomes and impact that they propose to produce under the Program. Outcome measures should incorporate the full range of CDFI activity and include measures relevant to consumer finance and community development as well as more common measures of jobs created or housing units financed.

Conclusion

In the coming weeks, the CDFI Fund will make critical decisions about implementing the CDFI Bond Guarantee Program. Please keep in mind that a core strength of the CDFI industry is its diversity, and a one-size-fits-all approach in the regulations will seriously limit the program's success. The diversity of the industry also makes it difficult to mandate specific outcomes and impact, a priori, demonstrating the necessity of a program that assesses each bond application on a case-by-case basis. Throughout its history, the CDFI Fund has demonstrated flexibility and an appreciation for the unique contributions of different types of CDFIs. This operating philosophy will be particularly important in writing regulations for the CDFI Bond Guarantee Program.

Thank you for your consideration of these comments and for your efforts on behalf of consumers and the capital markets. Please feel free to contact our Executive Director, David C. Brown, for any clarification of these comments.

Sincerely,

Lou Tisler
Board President
