

Attachment #1- Market Study Summary

(To be included at the beginning of the market study)

Development Name: _____

The Market Study prepared by: _____

Date of Study: _____

Page # of specific answers requested below. Please do not list a large range of pages.

- A map delineating the primary market area (PMA).
- A photograph of the site.
- A full description of the site.
- Discussion of the appropriateness of the location.
- A demographic summary of the market area, including incomes, households, growth trends, economic factors relating to employment, labor force, and community facilities (i.e. parks, schools, etc.)
- An evaluation of the current affordable housing stock existing in the market area, including an identification of geographical location, occupancy levels, age of stock, upkeep condition, bedroom mix, amenities and rents being charged.
- Include comparable rental residential Developments in the primary market area and all Tax Credit Developments.
- A discussion of any relevant information regarding existing rent overburden statistics. (Not applicable to rehabs with current occupancy of 90% or more.)
- An evaluation of the need for affordable housing within the primary market area. (Not applicable to rehabs with current occupancy of 90% or more.)
- A discussion of whether or not the proposed Development, in light of vacancy and absorption rates for the applicable market areas, is likely to result in an increased vacancy rate for comparable units within such market area, (i.e., standard, well-maintained units within such market area that are reserved for occupancy by low and very low Income tenants).
- A projection of the time necessary for the Development to achieve sustaining occupancy. (Not applicable to rehabs with current occupancy of 90% or more.)
- Provide the recommended vacancy rate.

Discuss the capture rate for the primary market area. A 30% affordability factor must be used when calculating the number of Income Qualified Renter Households. For family developments, a capture rate over 10% will result in a failed threshold. For elderly developments, a capture rate over 15% will result in a failed threshold.

An evaluation of whether the projected initial rents for the Development are or are not reasonably affordable by low and very low-Income tenants and within the rental range for the comparable Developments within the market area. Include market advantage/disadvantage analysis. Also include Income Averaging analysis that shows adequate demand, this includes capture rates for each applicable percentage the Development wishes to serve, if the Development is utilizing such option.

A summary of qualifications for the individuals who participated in the Development of the market study.

A signed written statement is required from the preparer of the market study which certifies that the market study is true and correct to the best of the professional's knowledge and belief, and that there is no identity of interest between the professional and the Applicant, Developer, Owner or the entity for whom the report is prepared.
